

(a) Conceptual model architecture

(b) $K(z)$ at $T = 250 \text{ K}$ (with radiative multiplier $1 + \chi(T/T_{\text{ref}})^3$)

(c) $K(T)$ at $z = 30 \text{ cm}$ (deep limit; radiative multiplier dominates)

— Hayne (2017) — smooth exponential - - - Martinez & Siegler (2021) — piecewise 3-layer M&S > Hayne region (panel b)
