

(a) TG vs TR cross-prediction

(b) Leave-one-deepest-out residual

Held-out validation

- TG fit, evaluated on TG (in-sample)
- TG fit, evaluated on TR (out-of-sample)
- TR fit, evaluated on TR (in-sample)
- TR fit, evaluated on TG (out-of-sample)
- $|\text{model} - \text{obs}|$ at the deepest withheld sensor
